PAGES 2 ENCLOSURES (NO. & TYPE) 25X1C

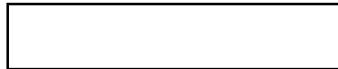

REMARKS 25X1C

25X1X

- 25X1A 1. 27 Li-2s landed at Erfurt-Bindersleben airfield, coming from an east-northeasterly direction. Three twin-engine planes and 3 cargo gliders landed at 10:40 a.m. On 2 July, six twin-engine planes towing cargo gliders took off at 9:05 a.m. and 9 Li-2s flew over Erfurt at 4:20 p.m. About 20 Li-2s landed at the field at 7:45 a.m. on 3 July. Between 1:40 p.m. and 2 p.m. on 4 July, six twin-engine planes towing cargo gliders took off from the field and headed east-northeast. 1
2. Between 4 and 4:10 p.m. on 1 July, three detonations which believed to have been underground were heard from the northern edge of the field, at intervals of two minutes. At about 5 p.m. on 2 July, heard at the northern edge of the field a hammering noise, apparently from an underground place in the direction of the old tank installations. The roar of a motor was also heard. On 2 July, numerous tracks of trucks were observed leading from the Bindersleben railroad station to the northwestern corner of the field, crossing a 50-meter gap in the fence. 2
3. Between 9 a.m. and 9:30 a.m. on 9 July, three formations of twin-engine planes crossed over Erfurt and headed toward Erfurt-Bindersleben, where the planes are believed to have landed. 3
4. No occupation was observed at the field on 14 and 15 July. Radio installations observed at the field included an installation with four masts, another with one mast, and a radio truck with a 7-sectional antenna. 25X1C
- 25X1C 25X1C
- 25X1A 1. Comment. an air transport exercise was held between Erfurt-Bindersleben and Brandis airfields. The latter field was occupied for the purpose by a unit of about 32 Li-2s and an undetermined number of Il-12s, with one cargo glider each. The unit probably arrived from outside East Germany and conducted intensive formation flying prior to 14 July, with landings at Erfurt-Bindersleben airfield. It departed from Brandis airfield on 14 July. It is possible that the aircraft of the transport regiment of the Twenty-Fourth Air Army from Schoenefeld airfield were also involved in the exercise. See 25X1A

CLASSIFICATION SECRET

25X1A

2. ☐ Comment. Construction work is possibly under way on the northern edge of the airfield.

25X1A

3. ☐ Comment. The unit probably came from Brandis airfield. On the morning of 9 July, air activity was also conducted by Li-2s.

25X1A

- ☐ Comment. This observation corresponds with the information from Brandis airfield that the transport unit departed from Brandis on 14 July. The radar set is of type Rus-2.
